**Subject:** FW: Blurb on U&O FIP for Admin Report

Jody,

Can you send me something for the Administrators report on the U&O FIP (see examples below)? I need this by Monday morning at the latest if possible.

As for signature date, ADP tracker is projecting July 20 but that may slip by a week or so. Carissa has a meeting later today and should get confirmation from OMB on the expedited review we requested. I let Carissa and Kristien (OAR Special Assistant to the Administrator) know the rule is an RA priority to help push the signature along.

Eric

**Subject:** Blurb on U&O FIP for Admin Report

Hi Dee,

Just a heads up and reminder that when the U&O FIP makes it way to HQs for signature we will need to put a blurb in the Administrator's report. Paula or I can do this for you. Here is a few examples to use as a template...it should be pretty brief.

Eric

## **Region 1**

On April 11, EPA will sign a notice of proposed rulemaking for the promulgation of water quality standards for those standards submitted by the State of Maine, which EPA disapproved in 2015. EPA plans to post the proposed rule online and conduct public outreach efforts in advance of publication in the Federal Register. The State of Maine has filed a suit in district court challenging EPA's disapproval actions.

## **OAR – Kristien Knapp**

As early as the week of April 4, pending the conclusion of interagency review, EPA will issue a final rule to make amendments to its mobile source regulations. The regulatory amendments will: 1) provide downstream end user exemptions for product transfer documents for renewable fuels; 2) clarify the gasoline sulfur credit generation period end date; 3) restore regulatory text that was inadvertently deleted in a prior final rule; and 4) extend a compliance deadline for performance-based measurement systems (PBMS) for some gasoline test methods to January 1, 2017.

## **Region 1**

By April 15, EPA will release a draft Supplemental Environmental Impact Statement (SEIS) to evaluate the potential designation of one or more dredged material disposal

sites to serve the eastern Long Island Sound region, and issue a proposed rule to designate such a site, for a 60-day public comment period. This site(s) would replace the New London and Cornfield Shoals disposal sites, which will close in December 2016. New York has previously stated its opposition to the designation of a new site, and is pushing to “reduce or eliminate” dredged material disposal in the Long Island Sound.
